Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 27-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al. WO 93/04559 in view of Fontworks, Sanity Font.
3. Brown teaches an advertising or promotional image displayed on a surface or a field at a sporting event (for example) wherein the image appears to be transformed. The image is reconfigured (page 4 line 25 through page 5 line 14) and then applied to surface10. The image then appears to extend at an angle greater than the angle of actual line of sight of the observer. The transformation of the image may be done by a computer (page 5 line 19).
4. Brown does not teach secondary and tertiary figurative elements, however this is shown by Fontworks. Fontworks teaches additional elements such as shadow, relief and background. It would have been obvious to a person having ordinary skill in the art to utilize such additional elements in the image of Brown et al. so that the image will appear more realistic.
5. Brown does not specifically teach using ink to create the image, however ink is old and well known in the art of creating images, particularly advertising or promotional displays. It would have been obvious to one of ordinary skill to utilize ink to create the

image used in Brown so as to provide an image that will not easily or inadvertently be removed.

6. Brown does not specifically teach the angles recited in claim 27, however it would have been obvious to a person having ordinary skill in the art to determine the appropriate angles (or to use a computer to do so) so that the image appears to protrude at a right angle to the observer's line of sight, as desired by Brown.

Response to Arguments

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

8. The Brown reference has been applied in response to Applicant's amendments to the claims.

Conclusion
